

PRICE GROUP

Price Group may appear on detailed product descriptions for many beverage parts. Below is a list of those price groups, definitions and examples for your reference.

Part (P)

Definition: A component or kit that is necessary for a piece of equipment to function or appear as it did when manufactured.

Examples: Motors, compressors, panels, rebuild kits, hardware such as screws, bolts, nuts, etc.

Accessory (A)

Definition: A component or kit used in conjunction with a piece of equipment to deliver product. An accessory is also an item that is not necessary for proper equipment performance but rather adds to the convenience, appearance, or effectiveness of the equipment.

Examples: tubing, fittings, regulators, carbonators, pumps, racks, spare parts, kits, non-standard merchandisers, cup and liquid holders.

Ice Makers (I)

Definition: Items categorized by the following Cornelius item classifications: IE, IH, IM, IN, IP, IR, IT, IW, IZ IY, I3, IA, and ID. These item classes have been defined and are subject to modification by Cornelius Product Management.

No Discount (N)

Definition: Consumer-based products and specialty sale items that are sold at a net price with no discount off of published price.
